KHADIJA ZAHRA

Software Engineer | khadijazaha153@gmail.com 0300-1537153 LinkedIn GitHub Portfolio

PROFILE

Final-year Software Engineering student with hands-on, full-stack development experience across modern JavaScript/TypeScript stacks , from backend APIs and database design to React/Next.js frontends. Strong problem-solving and project management skills, developed through end-to-end ownership of technical work, from planning through deployment. Growing expertise in applied AI engineering, including LLM integration and retrieval-augmented generation (RAG). Comfortable working independently in fast-paced, deadline-driven environments.

EDUCATION

- **BS, Software Engineering** Dec 2022 – Present
  PUCIT
- **FSC ,Pre Medical** June 2019 – April 2022
  Govt.College for Women Layyah Grade : 98% | A+
- **Matriculation** March 2017 – June 2019
  New Vision High School Layyah Grade : 95% | A+

EXPERIENCE

Full Stack Intern

- **Musketeers Tech** July 2026 - Sept 2026

Completed a full-stack and AI engineering internship, building **three production-style applications** from the ground up. Progressing from core engineering fundamentals — Git/GitHub workflows, code review, into backend systems with TypeScript, Node.js, Express, and JWT authentication, and worked across PostgreSQL for database design using Prisma. Developed frontend applications with React and Next.js, and applied AI engineering skills —LLM integration, and RAG pipelines with vector databases.

PROJECTS

- **Intern Management System**: Full-stack platform for managing internship programs built for **Musketeers Tech** — cohorts tracking, task assignment, submission review, attendance, with AI-assisted task drafting , AI weekly insight and a RAG-powered chatbot for questions like "who's blocked or falling behind?" on the mentor dashboard . Interns can view and upload submissions for tasks. Used Cloudinary for tasks' files storage.
  Live Links: Application | GitHub Repository
  Tech Stack: Next.js, TypeScript, Node.js/Express, PostgreSQL, Prisma , PineCone , Cohere Embeddings , Cloudinary

- **Ask My Internship** : A RAG-based chatbot that answers questions about my internship experience, learning and projects, grounding responses in real documents via embeddings (cohere) and vector search (Pinecone).
  Live Links: Application | GitHub Repository
  Tech Stack: Next.js, Cohere, Pinecone , Groq API

- **Foodly**: A food delivery platform supporting multiple independent restaurants, customer ordering, rider-based delivery, and post-order reviews.Customers browse restaurants, view menus, place order and review order. Owners can add menu items, review orders/assign rider.
  Live Links: Application | GitHub Repository
  Tech Stack : TypeScript, REST APIs, PostgreSQL, JWT + bcrypt Authentication , Middleware , Zod , Swagger

- **Hunar Ustad Exchange:** A two-sided marketplace connecting people across Pakistan with verified local skilled workers (ustads) , electricians, tailors, tutors, plumbers, carpenters, mehndi artists and more — booked and rated by their own neighbourhood.
- **Live Links**: Application | GitHub Repository
- **Tech Stack** : React + Vite, Firebase Authentication , Firestore

SKILLS

Languages: JavaScript, TypeScript, C#, Python, Java, C , C++ , SQL
Web: React, Next.js , Tailwind CSS, Node.js, Express, REST API , JWT Authentication, Zod,Swagger, PostgreSQL, SQL Server, Prisma
AI/LLM Engineering: Prompt Engineering , RAG Pipelines , Cohere , Pinecone (Vector Search)
Tools&Platforms: Git/GitHub,Postman,Vercel,Cloudinary,ClaudeCode,Figma,NanoBanana, Selenium

CERTIFICATIONS

- The Ultimate Job-Ready Data Science Course — **CodeWithHarry** | Complete Android & Kotlin App Development — **Udemy**
- Complete Figma Course: — **Udemy** | Docker for Beginners & Mastering Selenium — **Udemy**
- UI/UX Design Challenge — **PUCON 24** – Participated in a competitive design challenge at PUCIT.
